Subject Average	**8,84**	**9,44**	**9,44**	**9,18**	**9,10**	**9,17**	**9,18**

How Does Performance Vary Across Classes?

Performance Volatility

Academic performance is relatively consistent across assessment types, but shows greater variatior over time and across subjects and classes. Recent performance peaked in November 2025 before declining sharply in December.

Where Do Performance Gaps Occur?

Performance differences appear more pronounced across subjects and classes than across assessment types, pointing to class–subject combinations as the next area for deeper analysis.

Class Performance

Average Grade 9,16

Exam Average Grade 9,14

Homework Average Grade 9,17

Test Average Grade 9,11

Project Average Grade 9,26

Quiz Average Grade 9,17

Which Subjects Are Strongest and Weakest for Each Class?

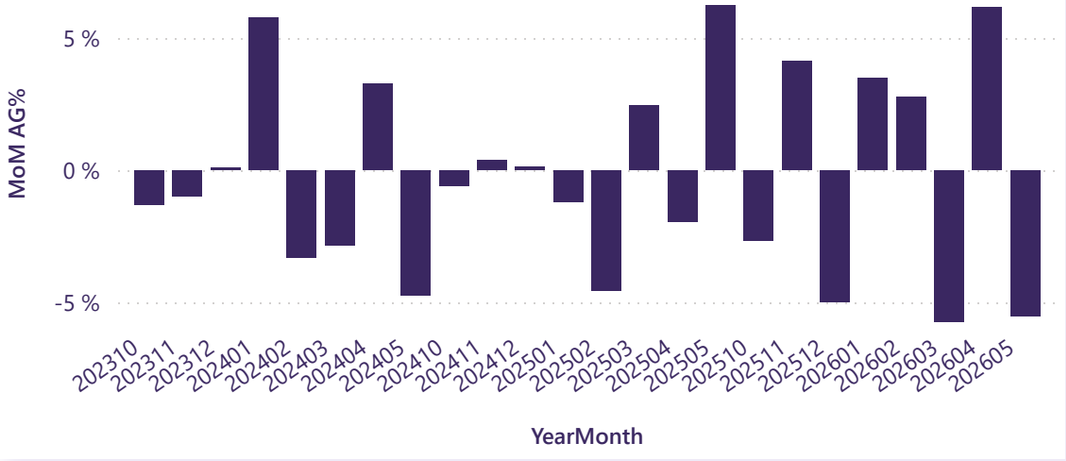

Class Name	Top Subject	Class Avg Subject Grade	Benchmark Difference	Lowest Subject	Class Avg Subject Grade	Benchmark Difference
Grade 10 - Section A	Robotics	10,33	0,90	Mathematics	7,89	-1,04
Grade 10 - Section B	Computer Science	10,00	0,92	World History	7,75	-1,52
Grade 5 - Section A	Music	10,75	1,66	Civics	7,67	-1,31
Grade 5 - Section B	Art	10,38	1,38	Geography	7,25	-2,02
Grade 6 - Section A	Civics	10,00	1,02	Physics	7,20	-1,99
Grade 6 - Section B	Earth Science	10,08	0,79	Civics	7,50	-1,48
Grade 7 - Section A	Earth Science	10,50	1,21	Environmental Science	7,83	-1,22
Grade 7 - Section B	World History	9,80	0,53	Economics	8,13	-0,96
Grade 8 - Section A	Civics	11,00	2,02	English Language Arts	7,00	-1,92
Grade 8 - Section B	Physical Education	10,14	1,24	English Language Arts	6,50	-2,42
Grade 9 - Section A	Chemistry	10,50	1,30	Economics	7,71	-1,37
Grade 9 - Section B	Earth Science	12,00	2,71	English Language Arts	7,00	-1,92

How Is Performance Changing Month to Month?

How Does Negative Grade Risk Vary by Assessment?

Performance Gaps Are Localized
Performance gaps are driven by specific class–subject combinations rather than consistently weak classes, suggesting that improvement efforts should be targeted by subject, not applied class-wide.

Averages Mask Performance Risk
Assessment averages are very similar, but negative-grade rates differ substantially. Averages alone can hide uneven outcomes.

Performance Shifts Are Irregular
Month-to-month changes show short-term volatility. It is important to determine whether it has longer-term impact.

Class Average	**9,38**	**9,44**	**9,13**	**9,62**	**9,58**	**9,46**

Assessment Profile

Grade 6 - Section B shows the strongest performance in Project (9.62), while Homework has the lowest average (9.13).

Student Performance Range

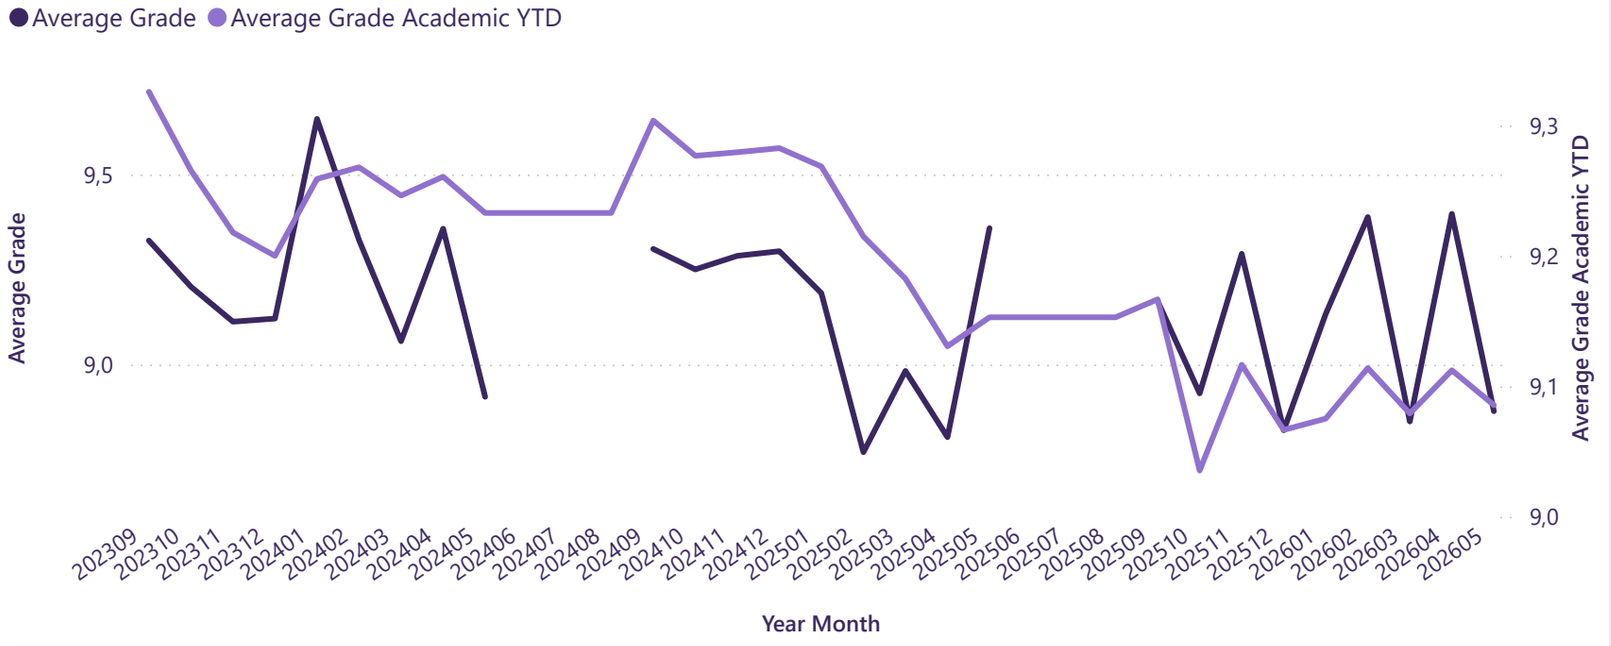

Grade 6 - Section B has a 1.97-point student performance range, 20% wider than the average across classes. Oliver Bailey defines the upper end (10.27), while Audrey Turner defines the lower end (8.31).

Performance Concentration

Grade 6 - Section B: 47% of students perform below the class average, compared with 52% typically across classes. The share of lower-performing students is broadly consistent with the pattern seen across other classes.

Performance Trends & Key Findings

Are Short-Term Changes Affecting the Academic-Year Trend?

Cumulative Performance Shows Downward Pressure Across Academic Years

Despite substantial month-to-month volatility, the Academic Year to Date average tends to decline within the observed academic-year periods. This suggests that weaker monthly results are not purely temporary and can accumulate into lower cumulative performance.

What Does the Analysis Tell Us About Academic Performance Overall?

Academic performance is generally stable at the overall level, but the analysis shows that performance risk is not systemic — it is concentrated in specific class–subject combinations and among selected students. Short-term fluctuations are common, yet repeated weaker periods can accumulate into lower Academic Year to Date performance. This suggests that broad school-wide interventions would be less effective than targeted monitoring of underperforming class–subject combinations, followed by student-level investigation where needed.
